

32 West 14th St.

FRIDAY
Remnant Day

1,000 remnants of all-wool Dress Goods, as Cheviots, Storm Serges, Cashmeres, Homespuns, Flannels, &c., in all colors and

merly sold .39, .49, .59; all at	
one price, per yard.....	.25
300 assorted Remnants of Dress	
Goods, Gingham, Sateens,	
Challies, &c.; all at.....	.05
00 Remnants Changeable Satin	
Merveilleux and Changeable	
Surah; formerly sold at 89.....	.59

100 Fur Neck Boas.....	1.49
Odd sizes and lots of 5-button and	
7 Hk Kid Gloves, worth 1.00,	.62
1-button length Suede Mousq.	
Gloves, worth .89.....	.53
Wide all-silk ribbons, worth 19c	.09
100 odd pairs Lace Curtains, worth	
2.00 to 3.00, at	

00 Pillow Sham Holders, adjustable, worth 35, at.....	.15
000 Remnants Ingrain Carpets, 1 1/2 yd. length, worth 75c. at.....	.19
00 Odd Chenille Portieres, handsome dado and frieze, fringed top and bottom, worth \$6.00 each, each.....	1.25

Rem. Fruit of the Loom Muslin, at	.003
Rem. Table Damasks, full lengths	.89 up
Rem. White Shaker Flannel, at	.053
Rem. Dark Chantilly Prints	.023
000 Heavy Silkoline Comfortables	1.29
5 full size 40 lb. Pure Hair	
Mattresses	7.88
20 Pure 3 lb. Feather Pillows	.49

Drawers in natural and Camel Hair.....	.98
Men's Heavy Scotch Wool shirts and Drawers.....	.75
Odd lot of Men's Heavy Merino Shirts and Drawers.....	.89 and .49
Special Bargain in Men's Neckwear.....	.25

Shirts and Drawers.....	.59
Ladies' Heavy Merino Shirts and Drawers.....	.39 and .49
Ladies' Heavy Ribbed Cotton Vests and Pants.....	.39 and .49
Ladies' Warranted Fast Black Richelieu Rib Lisle Thread Hose.....	.35

19 and .25

BREAD FROM WOOD.

Reported Discovery of Renowned
German Scientists.

Two years ago Victor Meyer, the emi-

Germany, in a public address delivered before the students of the University at that place, said: "Chemistry is the greatest traveller, the revealer of hidden mysteries. . . . We may even reasonably hope that ere long it will teach us to make the fibre of wood a source of human food. The fibre of wood consists es-

to starch? If it can the food problems of the nations is forever solved.

"Starch has about the same percentage composition, &c., wherever found, but it differs very much in its properties, and the nature of its molecules has always been one of the greatest enigmas to the chemist. But a new era is dawning; we are beginning to read cellulose molecules

His co-laborers took the cue and have industriously worked to prove the dreams of the master mind; and they have, if the popular scientific writers are to be relied upon, made cornstarch from cellulose and read from the "chemically pure" starch, which is said to be more nutritious than that made from either barley

If this is all true to the letter, as we hope it is, the broad question will soon become one of secondary importance, as the supply will be practically inexhaustible.

A "BEGUM" HAT.

One That Astonished the Inhabitants of the City.

"A begun lat once caused me considerable embarrassment," says Howard Johnson, an enthusiastic geologist, in the *Cincinnati Commercial Gazette*.

"In 1873 I was making some explorations in the mountains of North Carolina and Eastern Tennessee. The natives were a very primitive lot, and few of them

"One evening I reached a village of perhaps two dozen houses and created as much excitement as a circus in the 'black belt.' Everybody turned out to stare at me and follow me about, and couriers were despatched to the country folk to

"They were soon arriving, afoot, on mules and steers, and one old fellow came in hot haste astride a bull wearing a rope for a bridle. I was vexed and puzzled. I secured quarters for the night and went to my room, but the crowd hung about the house and talked in subdued whispers.

"Finally a committee composed of two of the oldest citizens was appointed to wait upon me. The permission was to in-

for that tall hat. I removed the begum,
and they inspected it, and took a careful
survey of my head. They looked disapprovingly
pointed and said they didn't see any use
for more hat than head.

"After that I wore a regulation slouch
until I got back to civilization. I did not
care to afford any more circus pageants."

Trying an Experiment.

A prominent Harlem journalist recently applied for the fifth or sixth time to a wealthy friend for a temporary loan.

"Don't you know," was the reply, "that it is very painful to be always lending money?"

"No, I didn't know that," replied the journalist.

"I never did anything of the kind in my life, but if you will let me have \$20, I'll lend some fellow a nickel just to see if what you say is so."
